TrueCopy Technology™

"True" Duplication Technology for True Professionals

What is TrueCopy Technology?

TrueCopy Technology is a set of exclusive features developed and offered by R-Quest Technologies, LLC. Incorporated into all of our machines, TrueCopy Technology allows you to reproduce the highest quality copies in the shortest amount of time.

TrueQA

Tests the quality of recorded media by rejecting discs that have an unusually high number of correctable errors. This allows the machine to reject poor quality media that other copiers overlook.

TrueSpeed

Automatically selects the fastest recording speed recommended by the media. (Available when using CD-RW's only).

TrueLaser

Unlike ordinary CD recorders that calibrate the laser before writing, TrueCopy recorders dynamically adjust recording laser power throughout the disc ensuring the highest possible recording quality.

TrueRID

Optionally marks each CD-R/RW with an Orange Book compliant unique recorder number.

A true original deserves a TrueCopy™
